3. 75.2: Special Equipment

The next three sections detail items and costs for those things that are either unique, hard to find, or must be custom-made for personas. Such items or equipment will always cost more than a comparable standard counterpart. Game Masters should base the price on the values given below, and adjust up or down depending on availability and any custom features desired by the HPs.

3. 75.21: Specially Constructed:

Those things which are not usually purchased by the average, everyday person (whoever that is...) come under the heading of Specially Constructed. Note that some things which are otherwise common may be included in this section if they are unusual in design or size. Also considered are those items which must be made by a craftsman. Items of this sort which are not readily available may take days, weeks, or even months to construct, and should be subject to a secret roll by the GM to determine the final quality.
